My Machine

Groundbreaking

My machine inside of me
Has everything that I would need
I guess it could take up less room
Well I hear it speak to me
Talking ever so calmly
Telling me what to doTake apart my insides
Tangle all these wires
Cut me off from this life
And I will never get tired
Brace the bones with steel
Make me just like you
None of us are real
When all of us are newDid you ever think we'd be here today?
Who would ever think we'd survive the waves?
I don't think any of you prepared
For all electrical rays
We take our machines for granted
And they will number our days[Chorus]Make me just like youOh, oh, oh, oh, no, no, no, no
My machine
As you can see
Takes a bit too much from me
I think it's running me empty[Chorus]My machine
As you can see
Takes a bit too much from me
I think it's running me empty...
Ah...
