Melt Me

Hanni El Khatib

Come over and melt me
Like an ice cream cone on the street in the sun
Come over and melt me
Why can't you finish what you've begunI believe in this darlin'
I know what I feel is true
Won't you sleep in the back tonight
And I can love with youAnd if you ain't scared
It shouldn't be that hard
I don't want to be alone
Come over and melt meThey all told us "no, it'd be too hard to stick it out"
It was a bold move to try, but I thought we'd figure it outI felt glad for a while
Distance broke us apart
I grew too used to the space
But you know my heartAnd it made me scared
It became that hard
I don't want to be alone
Come over and melt meI wish you were closer
I wish you were closer to me
I wish you were closer
I wish you were closer to me
I wish you were closer
I wish you were closer to me
I wish you were closer
I wish you were closer to meAnd if you ain't scared
It shouldn't be that hard
I don't want to be alone
Come over and melt me
Come over and melt me
Come over and melt me
Come over and melt meHey.
