

Incision

Osmik

Don't leave us
They said that you had gone astray
Don't lead us
Away from the light We stood behind the veil
And watched you walk away from us
You shattered all our dreams
In one fatal mistake You fractured every piece of life
That we cared about, remember how
You breathed in us new life and then you took it away
You'll never live that down I gave you every guiding word
To cut it off, cut it off, cut it off, cut it off
Now you hand me back the blade
To make that first incision for you Wait and see
The weight of life may be the end of me
The tension, break me Wait and see
The weight of life may be the end of me
The tension, break me We held you up on high
So why did you abandon us?
We never thought you'd be the one
To fall so far You fractured every piece of life
That we cared about, remember how
You breathed in us new life and then you took it away?
You'll never live that down I gave you every guiding word
To cut it off, cut it off, cut it off, cut it off
Now you hand me back the blade
To make that first incision for you, for you Wait and see
The weight of life may be the end of me
The tension, break me Wait and see
The weight of life may be the end of me
The tension, break me Wait and see
The weight of life may be the end of me
The tension, break me Wait and see
The weight of life may be the end of me
The tension, break me Wait and see
The weight of life may be the end of me
The tension, break me
