

Twilight Time

Stratovarius

Danger zone
I look into the mirror
See my face again I hear myself preaching
You are getting bold
Growing old, skin turns cold You're to blame
But I will find the way to be
Myself again I break the mirror with a noise
Stop preaching me
Teaching me, live in me There's no way to stop me now
My end is in sight
I reach for the light
Tonight, tonight, tonight Twilight time
It's twilight time
Reaching for a morning light
It's twilight time Twilight time
It's twilight time
Reaching for a morning light
Twilight time It's twilight time
It's twilight time
Reaching for a morning light
It's twilight time It's twilight time
It's twilight time
Reaching for a morning light Twilight time
