

# Drive Me

## Phillip Phillips

All I wonder if my night is gonna change  
Lights moving bodies grooving but I cannot feel a thing  
I've got one step to the door  
Then I hear aaaaaaaaa  
Light gravity pulling me in  
I'm sinking in this space within  
I can't help but giving in to this stranger with no name  
Dancing like a flame, like a moth, I cannot be turned awayLeave me, take me far from here, sweet ladyDo  
what you do, and do what you will  
Let me get down, take a hold of the wheel  
Let me drive you crazy  
Do what you do, and do what you will  
Let me get down, I'll be all that you feel  
I'll let you drive me crazyI love your moves, I like your style  
With them hips you drive me wild  
I'm the puppet to your strings  
You keep on moving me  
And the world you keep on turning  
Turning from me now  
Everything we have is moving down down down  
We just keep on grooving all down down downLeave me, take me so far from here, sweet ladyDo what you do,  
and do what you will  
Let me get down, take a hold of the wheel  
Let me drive you crazy  
Do what you do, and do what you will  
Let me get down, I'll be all that you feel  
I'll let you drive me crazyDo what you do, and do what you will  
Let me get down, take a hold of the wheel  
Baby let me drive you crazy  
Do what you do, and do what you will  
Let me get down, I'll be all that you feel  
I'll let you drive meDo what you do, and do what you will  
Let me get down, take a hold of the wheel  
Baby let me drive you crazy  
Do what you do, and do what you will  
Let me get down, I'll be all that you feel  
I'll let you drive me crazy  
Oh say oh  
I'll let you drive me crazy
