

# No Bad News

Patty Griffin

Don't bring me bad news, no bad news  
I don't need none of your bad news today  
You're a sad little boy, anyone can see it  
    Just a sad little boy  
That's why you're carrying on that way  
    Why don't you burn it all down?  
    Burn your own house down  
    Burn your own house down  
    Try to cure your own disease  
    And leave the rest of us  
There's a lot of us, leave the rest of us  
Who want to live in peace, to live in peace  
I'm gonna find me a man, love him so well  
    Love him so strong, love him so slow  
We're gonna go way beyond the walls of this fortress

And we won't be afraid, we won't be afraid  
And though the darkness may come our way  
We won't be afraid to be alive anymore  
And we'll grow kindness in our hearts  
    For all the strangers among us  
    'Til there are no strangers anymore  
Don't bring me bad news, no bad news  
I don't need none of your bad news today  
You can't have my fear, I've got nothing to lose  
    Can't have my fear  
I'm not getting out of here alive anyway  
    And I don't need none of these things  
I don't need none of these things I've been handed  
The bird of peace is flying over, she's flying over  
    And coming in for a landing
