

Self Vs. Self

Pendulum

If I struggle a lifetime
What would my body be?
An empty shell
On what a demon fed
Could be a heavy burden
To stay true to your words
Speak up
I wanna silence everything
We forgot no plan
Doesn't mean that I get what I want for free
We forgot no meaning
Would you force me to a place where I make sense?
'Cause nothing lasts forever
How do I get home?
Everything revolves around me
If I can't find myself?
It's so completely fake
How do I get home?
Everything revolves around me
If even you can't help?
Dark nights on my soul
I deny failure
I ignite
Woe is on my misery
She wins all their eyes
Realize what they find's not fate
This is not me, this is me
So if I struggle a lifetime
What good would that do?
We forgot a plan
Doesn't have to stop the feeling inside
If I do make sense
Would you drag me down?
'Cause nothing lasts forever
How do I get home?
Everything revolves around me
If I can't find myself?
It's so completely fake
How do I get home?

Everything revolves around me
If even you can't help?
Dark nights on my soul
