

# Stay

## David Guetta

Feel it in your kiss  
And I can see it in the stars  
I don't believe in magic  
But I know just who you are  
I'm not gonna leave you  
Cause you've giving me a reason to stay, to stay, to stay...

Feel it in your kiss  
And I can see it in the stars  
I don't believe in magic  
But I know just who you are  
I'm not gonna leave you  
Cause you've giving me a reason to stay, to stay, to stay...

Feel it in your kiss  
And I can see it in the stars  
I don't believe in magic  
But I know just who you are  
I'm not gonna leave you  
Cause you've giving me a reason to stay, to stay, to stay...

In my mind  
We belong together  
In your eyes  
I believe in,  
I can see forever

Feel it in your kiss  
And I can see it in the stars  
I don't believe in magic  
But I know just who you are  
I'm not gonna leave you  
Cause you've giving me a reason to stay, to stay, to stay...

Feel it in your kiss  
And I can see it in the stars  
I don't believe in magic  
But I know just who you are  
I'm not gonna leave you

Cause you've giving me a reason to stay, to stay, to stay...

I can feel it  
I can feel it  
I can feel it  
I can feel it... (Stay)

I want you to stay

Feel it in your kiss  
And I can see it in the stars  
I don't believe in magic  
But I know just who you are (I can feel it)  
I'm not gonna leave you  
Cause you're giving me a reason (I can feel it ) to stay,  
To stay... (I can feel it)

Feel it in your kiss  
And I can see it in the stars  
I don't believe in magic  
But I know just who you are (I can feel it)  
I'm not gonna leave you  
Cause you're giving me a reason (I can feel it ) to stay,  
To stay... (I can feel it)

Feeling in your kiss  
I can see you in the stars
