## Rip It

## **Electric Six**

When a problem needs a problem solver Guess who gets the call? Me that's allYou're duelling with a plugged revolver Guess who dropped the ball The writing's on the wallThe French sent us copper lady Long since turning green From New York to Los Angeles And all points in-between Burning 50 million MegaWatts of GasolineI accept my destiny I shall start a legacy The likes of which you've never seen Make them rip it Rip it clean I accept my destiny I am a ripping machine So help me!Rip it! Rip it! Rip it! Rip it! Rip it! Rip it! You're listening to your politicians They claim to speak to God Can't you see it's just a fraud? You're rituals and superstitions Don't you find them kind of odd? Might as well kneel before ZodThe French sent us a copper lady Long since turning green From New York to Los Angeles And all points in-between Burning 50 million MegaWatts of GasolineOooh!I accept my destiny I shall start a legacy The likes of which you've never seen Make them rip it Rip it clean I accept my destiny I am a ripping machine So help me!Rip it! Rip it! Rip it! Rip it!

Rip it! Rip it!Put me in motion
Drink the potion

Use the lotion

Drain the ocean

Cause commotion

Fake devotion

Entertain a notion

Be Nova ScotianDrink the potion

Put me in motion

Use the lotion

Drain the ocean

Cause commotion

Fake devotion

Entertain a notion

Be Nova ScotianDrink the potion

Put me in motion

Use the lotion

Drain the ocean

Cause commotion

Fake devotion

Be Nova Scotian

Be Nova ScotianRip it!
