

Weep No More

[Rick Springfield](#)

You left the room without a sound
And as you both walked out
The people still were dancing 'round
And when you touched, did it feel so bad?
You didn't pull away but now you wish you had
My baby's sad
Weep no more, I'm here beside you
Even though you let me down
Weep no more, let my love guide you
Shelter you from all around
Were you wrong? Did you go too far?
Sitting with him in the back seat of the car
Though you were young, I guess he thought you knew
Now it's just a little while before the baby's due, my baby blue
