Resistance

Big Mountain

Protests in New York Listen to the call of the wild Brother, sisters carrying signs Breathe deep before it's too late The sky is falling, burning your eyes Down in New Orleans river's boiling Nothing living, nothing to eat Thank the Lord, daddy's working 8-5 Paying the doctor, baby's got cancer Give and take Has all we've learned been wrong? Look around at what we've been given Maybe we've taken too long Resistance, shouts the man on the right Can't solve the problem overnight Resistance, Listen to the call of the wild Burning coal Got to keep the company warm as The rain keeps killing the trees Cut 'em down quick Pay the man his wage, he's making paper To fuel the "Information Age" Out in the Midwest Hear the roar of the plough Turning grassland into sand Got to feed the people more every day But the wind keeps blowing the land away Give and take Has all we've learned been wrong? Look around at what we've been given Maybe we've taken too long Resistance, shouts the man on the right Can't solve the problem overnight Resistance, Liberal opposition crying violation Stop the madness Resistance, Through the din, one voice we should hear Resistance, Listen to the call of the wild There's no easy solution

The price is high, and it's time to pay

Turn of the century vision
Focused on a better way
Resistance, shouts the man on the right
Can't solve the problem overnight
Resistance, Liberal opposition crying violation
Stop the madness
Resistance, Through the din, one voice we should hear
Resistance, Listen to the call of the wild
