How Could You?

Lisa Stansfield

I get up and look outside
Not a cloud up in the sky
The flowers are just coming into bloom
All the lovers walk together hand in hand
But paradise is nothing without youI didn't move your coffee cup
The cigarettes that you gave up
All memories of things we used to do
Now I don't even bother with my make-up
I just wanna turn around and wake up with youTo hold on forever a lifetime you said
So you can see it came as a surprise
After all the promises you made
Just tell me one thingHow could you baby?
How could you baby?
Tell me right now tell me why you changed your mind?
How could you baby?
How could you baby?
Take hold of my world turn, it upside down then say goodbyeI try to cheer myself a while
But can't remember how to smile?
If only I could make some sense of this
What I wouldn't say or do to hold you?
I'd give everything I have to give you one more kissTo hold on forever a lifetime you said
So you can see it came as a big surprise
After all the promises you made
Just tell me one thingHow could you baby?
How could you baby?
Tell me right now tell me why you changed your mind?
How could you baby?
How could you baby?
Take hold of my world, turn it upside down then say goodbyeAfter all the promises you made
Just tell me one thingHow could you baby?
How could you baby?
Tell me right now tell me why you changed your mind?
How could you baby?
How could you baby?
Take hold of my world, turn it upside down then say goodbye
Take hold of my world, turn it upside down then say goodbye
