

17 to a Million (feat. Jennifer Nelson)

Lyfe Jennings

We ain't getting older
We're getting better I'm not 21 no more
And you're not 17
We're not as young as before
But it's not bad as it seems 'Cause when you gave it out your 20's
You pick up more conscience of time
Start to cherish the little things
That really have value in your life I don't need to be young to love you with passion
You are my number one, all that I've imagined
Whether it's in this lifetime or in the next one
I will protect and love you
Whether you're 17 or a million
I'm not... can't say no more
And you're no Michael Vic
We're not perfect no more
But then again who is? 'Cause when you get up on your own
You spend less time working out
Beauty's here for a moment then it's gone
Thank God our loves are bound 'Cause I don't need to be young to love you with passion
You are my number one, all that I've imagined
Whether it's in this lifetime or in the next one
I will respect and love you
Whether you're 17 or a million
I don't need to be young to love you with passion
You are my number one, all that I've imagined
Whether it's in this lifetime or in the next one
I will protect and love you
Whether you're 17 or a million
