Wilderness

C.W. McCall

(C.W. McCall, Bill Fries, Chip Davis)From the album WildernessCome along and sing
A song you knew before
Come along and sing
Once moreCome along and live
A life you knew before
Come along and live
Once more[C.W. and backup singers]
Wake with me and feel the misty blue dawn
Come hear the wild bird sing her mornin' song
See the sun that only wilderness sees
Then walk with me and let your heart run freeCome on along and chase the wind once more
Come on along and try one more time
Come on along and find the trail once more
Come on along and live again[C.W. and backup singers]
Come with me and see the ridge run wild
Come hear the canyon call her wanderin' child
Breathe the air that only wilderness breathes
Then walk with me and let your heart run free[Musical interlude. Slow banjo pickin' and violins.]Come on along and climb the mountain once more
Come on along and try one more time
Come on along and cross the river with me
Come on along and live again[C.W. and backup singers]
Come with me and hear the night bird cry
And see the starlight fill the wonderous sky
Feel the joy that only wilderness feels
Come on along along and we'll be freeFly with me and find the end of time
Run with me and feel the wilderness high
Come on along and live forever with me
Come on along along and we'll be free
