

Last Before the Storm (Remastered 2016)

Gamma Ray

Who's controlling all the misery and pain
When the error signs are lighted in the masterhall
And from the start the action is in vain
'Cause the beast is always careful to avoid the fall
We crawl up to the skies, we'll never return again
We're the last before the storm
Watching the sun going down on us
We wish we had never been born
To be the last before the storm
Who's ever gonna change the world?
I don't understand what we are fighting for
The truth is sad, no lying, we are cursed
I don't really know who ever made the law
We cry out for more, we wonder what's next to the world
We settle the score, we never look back
We're the last before the storm
Watching the sun going down on us
We wish we had never been born
To be the last before the storm
Cry out for the people who don't know the world
They don't understand what they say and they're cursed
Lying for reasons in search for the truth
Mephisto we comin' down, Mephisto we comin' down
Mephisto we comin' down, down
We cry out for more, we wonder what's next to the world
We settle the score, we never look back
We're the last before the storm
Watching the sun going down on us
We wish we had never been born
To be the last before, the last before, the last before the storm
