Fire

Dead By Sunrise

No need to hear your voice or see your face
To know that you are with me
No need to kiss your lips or hold your hand
To know that you can feel me
I know that you can feel meWhen I look to the stars
I know just where you are
You're looking down upon meWhen I look to the stars
I know just where you are
You're looking down upon meNo need to get locked up inside the past
I know it isn't changing
No need to let you go or say goodbye
I know that you'll be waiting
I know that you'll be waitingWhen I look to the stars
I know just where you are
You're looking down upon meWhen I look to the stars
I know just where you are
You're looking down upon meOn the other side
On the other sideI've got to find a way
To keep my pain from burning
Down to the boneI've got to find a way
To keep my pain from burning
Down to the bone
Down to the boneWhen I look to the stars
I know just where you are
You're looking down upon meWhen I look to the stars
I know just where you are
You're looking down upon me
