Bullet With A Name

Nonpoint

My disposition is in a position for all to see
Regretless for how it feels

I got a bullet with a name on it
Bullet with a name

Becuase the cause of all the pause you think you see
Is really concentration on the steel

I got a bullet with a name on it
Bullet with a name

See everybody watching and passing judgement on
Every little move and decision I make
How can I be an individual with the weight of the world
With 8 other planets to take
And with everything happening, gunshots clappin
And people all running in every direction
With their hands up prayin for the drama to end

I got my hand out lookin for some money to spend
The price tags on the things I need are getting bigger by the way
I got a bullet with a name on it
Bullet with a name
The way i work so hard for things, they just take away from me
I got a bullet with a name on it
Bullet with a name

I'm workin harder than 100 black mules outta Mexico
No water, no clouds, no cover
From the hotter than hell, no dinner bell
Empty oven again from another bad opinion
I mean who doesn't want the cars, money, fame attention, bars, honeys
Games, attention, stars, funny how we saw we don't need it
Then turn around and try to achieve it

Everything that they say about me
The price tags on the things I need are getting bigger by the way
I got a bullet with a name on it
Bullet with a name

The way i work so hard for things, they just take away from me
I got a bullet with a name on it
Bullet with a name

And everything that they say about me
And everything that they make me need
Are nothing when they're taking everything away from me
Everyone trying to make it harder, and everyone saying I would never be
You're nothing but a name, on the bullet that I aim...
