Protection

Face to Face

Can't understand how we're better off this way
We know the truth still we're trying not to say
What needs to be said in time
I thought I could leave behind
These reasons that made me hide
It's stripping away the disguiseCan you save me from myself?
It's you and no one else
Gives me protectionCan't figure out why you're pushing me away
I own the truth so I think I'll be okay
Don't say that I'm in decline
A struggle I can't define
You said I made myself blind
I'm trying to open my eyesCan you save me from myself?
It's you and no one else
Gives me protectionYou said you'd never be okay
I saw myself in you that day
And I realized everything had changedCan you save me from myself?
It's you and no one else
Gives me protection
