

For U

Medina

I'll be torn if you hear me now
Tipping out like a ghost tonight
Don't you know infinity?
Side plots pleading you and me
I paint your world in purple lights, find a way to work it out for you
I'll take the sun on a trip to space
Building up a shining place for youFor you, for you
For you

You gotta hold on, just hold on, just hold on
And don't you let go, don't let go, don't let go
Don't you wanna go get down in history?
Baby, in the mean fall down in you and me
I'm moving on St. Clement's Street
Is turning into a creeper freak
What do I you like me to?
I do it all and it's for you
Just let me know whatever it takes to erase the the one next to you for you
I build you an empire place, sitting up in just one dayFor you, for you
For you

You gotta hold on, just hold on, just hold on
And don't you let go, don't let go, don't let go
Don't you wanna go get down in history?
Baby, in the mean fall down in you and meIn another world, in another life
I'll always be your girl, don't let me down tonight
For you
For you

You gotta hold on, just hold on, just hold on
And don't you let go, don't let go, don't let go
Don't you wanna go get down in history?
Baby, in the mean fall down in you and me
Tomorrowland, go
Tomorrowland, go
