

Complicated Disaster

Tina Turner

She knows about me
I heard about your secret life
She thinks that you're a family man
You've got two babies and a wife I never thought you'd sink this low
(Why did you have to paint a picture?)
Too many lovers in this room
I'm suffocating And now you're standing in front of me begging me not to leave
Complicated disaster
And as I struggle to understand what became of the man
Promised me ever after I turn away but I can't run
You're all that I remember It's been three hours
Since she shared her story in this room
She seems like such a gentle girl
You came and left her much too soon She said it lasted just six months
(But I could feel her devastation)
The fear of being completely wrong
Has taken over And now you're standing in front of me begging me not to leave
Complicated disaster
And as I struggle to understand what became of the man
Promised me ever after I turn away but I can't run
You're all that I remember All the plans we were making
Just got washed away with her tears
I'm drowning
But you can't save me this time, oh no Complicated disaster
And as I struggle to understand what became of the man
Who promised me ever after I turn away but I can't run, oh no And now you're standing in front of me begging
me not to leave
Complicated disaster
And as I struggle to understand what became of the man
Promised me ever after I turn away but I can't run
You're all that I remember
