Complicated Disaster

Tina Turner

She knows about me

I heard about your secret life

She thinks that you're a family man

You've got two babies and a wifeI never thought you'd sink this low

(Why did you have to paint a picture?)

Too many lovers in this room

I'm suffocatingAnd now you're standing infront of me begging me not to leave

Complicated disaster

And as I struggle to understand what became of the man

Promised me ever afterI turn away but I can't run

You're all that I rememberIt's been three hours

Since she shared her story in this room

She seems like such a gentle girl

You came and left her much too soonShe said it lasted just six months

(But I could feel her devestation)

The fear of being completely wrong

Has taken overAnd now you're standing infront of me begging me not to leave

Complicated disaster

And as I struggle to understand what became of the man

Promised me ever afterI turn away but I can't run

You're all that I remember All the plans we were making

Just got washed away with her tears

I'm drowning

But you can't save me this time, oh noComplicated distaster

And as I struggle to understand what became of the man

Who promised me ever after I turn away but I can't run, oh no And now you're standing infront of me begging

me not to leave

Complicated disaster

And as I struggle to understand what became of the man

Promised me ever afterI turn away but I can't run

You're all that I remember
