

# One Said To The Other

## The Living End

One said to the other  
You'll never find another  
Now that you're on your own  
To discover  
You're living undercover  
Now that you're on your \*own

She's not really bothered by a riot in Milan  
Only gets excited by the cheap shot brands  
Dressed up in a number that she got from Japan  
Powdered up, converted with solarium tan

You know that she won't leave here alone  
(You know that she won't leave here alone)  
She ain't ever gonna leave here alone

One said to the other  
You'll never find another  
Now that you're on your own  
To discover  
You're living undercover  
Now that you're on your \*own

She's not really in touch with the government plans  
Much too busy looking for a one night stand  
You don't have to show her before you get to know her  
And she's the type who plays the fool I don't understand

You know that she won't leave here alone  
(You know that she won't leave here alone)  
She ain't ever gonna leave here alone

One said to the other  
You'll never find another  
Now that you're on your own  
To discover  
You're living undercover  
Now that you're on your \*own

She ain't ever gonna leave here alone

(Ain't Ever gonna leave here alone)  
She ain't ever gonna leave here alone

She's not really bothered by the riot in Milan  
Only gets excited by the cheap shot  
Dressed up in a number that she got from Japan  
Powdered up, covered in solarium tan

You know that she won't leave here alone  
(Know that she won't leave here alone)  
She ain't ever gonna leave here alone  
(Ain't ever gonna leave here alone)  
Oh you know that she won't leave here alone  
(Know that she won't leave here alone)  
She ain't ever gonna leave here alone

One said to the other  
You'll never find another  
Now that you're on your own  
To discover  
You're living undercover  
Now that you're on your \*own

One said to the other  
You'll never find another  
Now that you're on your own  
To discover  
You're living undercover  
Now that you're on your \*own
