

Center of the Universe (Remode)

[Axwell](#)

The shadow of your smile
Under the open skies
As I close my eyes I can feel the wind ariseWe're made of stardust
Our lives ahead of us
We'll ride the magic bus into the heart of loveI can taste it, taste the feeling
Of the blue skies, they're for real
And we're the center of the universe
Just you and I, and I, and IThe shadow of your smile
Under the open skies
As I close my eyes I can feel the wind ariseWe're made of stardust
Our lives ahead of us
We'll ride the magic bus into the heart of loveI can taste it, taste the feeling
Of the blue skies, they're for real
And we're the center of the universe
Just you and I, and I, and II can taste it, taste the feeling
Of the blue skies, they're for real
And we're the center of the universe
Just you and I, and I, and II can taste it, taste the feeling
Of the blue skies, they're for real
And we're the center of the universe
