Through the Dark

KT Tunstall

As I walk away, I look over my shoulder To see what I'm leaving behind Pieces of puzzles and wishes on eyelashes failOhh, how do I show all the love Inside my heart? Well, this is all new And I'm feeling my way through the darkAnd I used to talk with honest conviction Of how I predicted my word I'm gonna leave it to star gazers Tell me what your telescope saysOhh, what is in store for me now? It's coming apartI know that it's true 'Cause I'm feeling my way through the darkTry to find a light on somewhere Try to find a light on somewhere I'm finding I'm falling in love with the dark, oh yeahOhh oh, what do I know? I don't care where I startFor my troubles are few As I'm feeling my way through the dark Through the dark I'm feeling my way through the dark
