

Sparks

Cover Drive

Happy to see you setting me off like sparks
You ignite all the colours inside my heart
On the doorstep like we'd never been apart
Hope you know that I'm happy to see you...

It's just another night
The boys are getting hype
But baby in my head
I'm nailing you instead
It's just another night
Under the strobe lights
Can't hear what I'm dancing to
Just wanna be you...

Ohh, chest tight, and I'm ready to go
On my mind I can't wait anymore...

Now happy to see you setting me off like sparks
You ignite all the colours inside my heart
On the doorstep like we'd never been apart
Hope you know that I'm happy to see you...

Them girls put on a show
But they will never know
What makes you beautiful
I watch them come and go
Them boys got all the talk
But they don't know a lot
You know my every thought
That's why I make them walk...

Ohh, chest tight, and I'm ready to go
On my mind I can't wait anymore...

Happy to see you setting me off like sparks
You ignite all the colours inside my heart
On the doorstep like we'd never been apart
Hope you know that I'm happy to see you...

Nothing needed to say

We got nothing to prove
The world doesn't matter no when I'm with you
We got no games to play
So we got no rules
The world doesn't matter
You're here and...

Happy to see you setting me off like sparks
You ignite all the colours inside my heart
On the doorstep like we'd never been apart
Hope you know that I'm happy to see you...

Happy to see you setting me off like sparks
You ignite all the colours inside my heart
On the doorstep like we'd never been apart
Hope you know that I'm happy to see you...
