Ghost Town

Egypt Central

I'll cut out the broken hearts down Union Avenue
Let the streets run red with my revenge
You can't fake apologies for everything you do
You can't repay the price that's on your head
The price that's on your head
When the sky comes down over this ghost town
You'll be first against the wall
With our guns held high in the dead of night
You'll be first against the wall
Come on, test me
You'll be first to take the fall
When the sky comes down over this ghost town
You'll be first, first against the wall
Scatter like the roach, like the insect that you are
Cowards always try to get away
No matter where you run, no matter where you hide
I will hunt you down, you can't escape
You can't escape
When the sky comes down over this ghost town
You'll be first against the wall
With our guns held high in the dead of night
You'll be first against the wall
Come on, test me
You'll be first to take the fall
When the sky comes down over this ghost town
You'll be first, first against the wall
Test me and you'll be shot down
Test me and you'll be shot down
Shot down, yeah
When the sky comes down over this ghost town
You'll be first against the wall
With our guns held high in the dead of night
You'll be first against the wall
Come on, test me
You'll be first to take the fall
When the sky comes down over this ghost town
You'll be first, first against the wall
First against the wall
