Day One

Lou Gramm

Hang on alone without you Hang on enough to do what must be done One bridge to cross and one to burnI'll tell you I won't hide And I won't run This is day oneI hear the drums on the battlefield Calling up my courage and my pride I can't explain the way I feel But my heart of heart won't be deniedEven in the darkest hours I know my time will come This is day one You don't know about me I'll give you a look inside my heart Don't walk away without me Because you know I've loved you from the startEven in the darkest hours I know our time will come This is day oneI had to watch from the shadows While the light of your star filled the sky It's what I live for, it's what I fight for Girl, I loved you so from day one
