Wake to the Sun

Cauterize

This gloomy weather doesn't break it any
Break it anymore
The sun abandoned us for blue skies somewhere
Blue skies somewhere warm
The world outside my window is scratching at my door
There's only stories
Look what life was like its cold[Chorus:]
(Take me away) Where the skies aren't
(Shades of grey) Baby, let's make
(Our escape) To a place where
(We can) wake to sun againBoard the windows up its cold as hell
Its cold as hell out there
Light some candles need to shed some light
To shed some light in here
The streets are cold and damp the trees are dark and black
This dancing sun it seems to blast right threw the year[Chorus]Lets leave it all behind us
Find a nice little island
We can live like a story
That ends like a fairytale
Leave all of your possessions
Forget all that you thought you knew
So we can live like a movie
That ends like we want it toAnd I wanna go
No no no no
[x3]
And I wanna goLets leave it all behind us
Find a nice little island
Where we can live like a story
That ends like a fairytale[Chorus 2x]
