

# Still

## Tamia

Yea, yea  
Usually when two people are together  
For a long time things seem to change  
It's been said that nothing good lasts forever  
But this love gets better every day  
We get all excited inside every time that we get alone  
He still got love in his eyes and I still got love in my soul  
Still and still feels like the first time we met  
That I kissed and I told you I loved you  
We still run around like teenagers even though  
We're grown and married with kids  
And we still talk on the phone for hours when I'm away  
He still writes letters and sends me flowers every other day  
The question everybody asks is how we make it last  
I tell them I still, he still, we still  
Now I still smile in the morning  
When I realize I'm still in his arms  
We know everything about each other  
But we still keep holding on, yea  
We never gonna break up  
We'll be always there to make up  
As long as we stick together we'll climb higher  
I'm gonna ride with him to the wire  
Our love is never gonna end, we're on fire  
Still and still feels like the first time we met  
That I kissed and I told you I loved you  
We still run around like teenagers even though  
We're grown and married with kids  
And we still talk on the phone for hours when I'm away  
He still writes letters and sends me flowers every other day  
  
The question everybody asks is how we make it last  
I tell them I still, he still, we still  
We go through problems just like everybody else  
But I really don't mind because it makes us keep it fresh  
Now what's sadder than an argument  
Is the thought we may have never been  
He is my lover, my baby's father, my lifetime partner and my friend  
Still the man of my dreams he's still

Still the man for me and I'm still in love with him  
So deeply, I think I'll sing it again, he's still  
Still the man of my dreams, he's still, still the man for me  
And I'm still in love with him, deep, deeply  
Still and still feels like the first time we met  
That I kissed and I told you I loved you  
We still run around like teenagers even though  
We're grown and married with kids  
And we still talk on the phone for hours when I'm away  
He still writes letters and sends me flowers every other day  
The question everybody asks is how we make it last  
I tell them I still, he still, we still  
Still and still feels like the first time we met  
That I kissed and I told you I loved you  
We still run around like teenagers even though  
We're grown and married with kids  
And we still talk on the phone for hours when I'm away  
He still writes letters and sends me flowers every other day  
The question everybody asks is how we make it last  
I tell them I still, he still, we still
