My Time With You

Neil Diamond

A little quiet conversation in the night
I need my time with you
It always seems to make
The day turn out alrightIt's easy when I'm here with you
And when life is hard to understand
You reach out for the hand
Of someone who believes in youAnd when I'm sure
I'm not worth anything at all
I need my time with you
When we're together,All those troubles look so small
When nothing seems real
Then I need my time with you
Hard times,City lights shine all over the sky
Don't you know in a dog eat dog world
We need each other to survive
I got to know if they storm the wallsI'll have you by my side
I turn the page
And see another restless day
I'll need my time with youI'll keep believing
Till tomorrow fades away
Takes only that moment with you
It's never easyWhen you got to keep it going
And your back's against the wall
As every dreamer knows,
It doesn't really matterIf you rise or if you fall
You can hand it all
To someone who believes in you
And cares for you,And shares that time with you
I need and I want
And I love my time with you
I need my time with you
