

Let Go

Paul Van Dyk

I'm falling apart
Falling in time I can't get it out of me, it's breathing inside of me
It's reaching inside of you
You're feeling infected, you've been infected
It's just like a cold, a kiss on your lips now you're taking control I feel like a criminal, I'm falling apart
I'm leaving for Venus in a getaway car
There's no one can save us, it's no need to try
I'm looking for saviors, holding us back If you wanna try and save me
Then take my heart and take me
If you feel you can let go, let go If you wanna try and save me
Then take my heart don't take me
If you feel you can let go, let go I feel like a criminal, I'm falling apart
You're leaving for Venus in a getaway car
You say that you hold me but you don't really know
You cling to the feeling but you gotta let go If you wanna try and save me
Then take my heart and take me
If you feel you can let go, let go If you wanna try and save me
Then take my heart don't take me
If you feel you can let go, let go Let go, let go, let go, let go
Let go, let go, let go, let go
Let go, let go, let go, let go
Let go, let go, let go, let go If you wanna try and save me
Then take my heart don't take me
If you feel you can let go, let go
