Home

Hayden Panettiere

Blue light raining down
And I chose a blazing love
Shining like a haunting tree
City glows a massive glow
Swinging on high traipse
Far above the crowds I see all I need
Is love spinning around the circus grounds
Take me and bring me home again
I see everything in front of me
Its love and only love can bring us home
Fires burning from sea to sea warming me
And I am free
Open doors in front of me

Only time knows when they'll leave
Everything ill ever need standing in front of me
All I see
Is love spinning around the circus grounds
Take me and bring me home again
I see everything in front of me
Its love and only love can bring us home
Only love
Only love
Is love spinning around the circus grounds
Take me and bring me home again
I see everything in front of me
Its love and only love can bring us home
