

## Metope

Now that we've found our place here  
Today, I will follow you anywhere  
And I, saw a smile upon your face  
And the wind still blows and that won't change  
And the sun goes down but we remain here  
Just like, just like, just like we always have.  
Just like, just like, just like we always have.

All our friends have passed, away  
And all our lines (?) have slept, for days  
And we can walk into, the world  
And the wind will blow and that won't change  
And the sun goes down but we remain here  
Just like, just like, just like we always have.  
(repeat until fade)
