Room 5

Unjust

The way you fooled the moon
The Virus you exhumed
Open wide...Even when you're all alone, I'm your sun
Even when you're not here with me, What have I become
Even if you feel the same, when I'm around
Even if the truth is spoken, What have I become.My Hand begins the tune
The pain begins to bloom
Open wide...Even when you're all alone, I'm your sun
Even when you're not here with me, What have I become
Even now there, and even then you're scared
Now the times right, so realize, its your time.First Time I seen you...
I couldn't face the moment...face the moment.It's The way you fooled the sun
That feeling you've become
The taste of broken sores
Open wide...
