

My Secret

[Anna Ternheim](#)

Today must have been one of the strangest days
Some would say that you wont find love that way
The best days are not planned by common sense, by lack of time
You just happen to be where everything feels fine
Its a new secret I have found
From today I'll change my
priorities around
Im no longer in command and people say
Im off solid ground and you're to blame
But they dont understand, people never do
It's confusing, I dont expect them to
Its a new secret I have found
Today must have been one of the strangest days
I found a place where I could stay
And people say that it will kill me
But they dont understand
People never do, but it makes sense to me
To be senseless, to change my plans for you
Its a new secret I have found
And I'm off solid grounds for you
