

Spotlight

Clint Crisher

Put me in the Spotlight
Everything will be alright
Put me in the Spotlight
I'm feeling in the mood tonight It's a hot and steamy afternoon
It's so hot so damn hot
I got this passion to boogie
Better quench it real soon
Someone better get this party started
Before I lose my mind
You're gonna lose your mind, you're gonna lose your mind
The DJ started pumpin and baby
It's right on time, yeah! Put me in the spotlight
Everything will be alright
Put me in the Spotlight
I'm feelin in the mood tonight I wanna boogie down, I wanna show you
What it's really really all about
Please don't tell me what I already know
Cause I got it already figured out
I wanna boogie down, I wanna show you
What it's really really all about
Please don't tell me what I already know
Cause I got it already figured out It's so easy to dream, not so easy to do
You gave me this vision now
I'm asking that we make it true
I see it, I believe it, and I'm asking it's that easy who knew?
Put me in the spotlight
and you will see, you'll see it's right! Put me in the spotlight
Everything will be alright
Put me in the spotlight
I'm feelin in the mood tonight I wanna boogie down I wanna show you
what it's really really all about
Please don't tell me what I already know
Cause I got it already figured out
I wanna boogie down I wanna show you
What it's really really all about
Please don't tell me what I already know
Cause I got it already figured out Someone better get this party started
Before I lose my mind
You're gonna lose your mind, you're gonna lose your mind

The DJ started pumpin and baby
It's right on timePut me in the spotlight
Everything will be alright
Put me in the spotlight
I'm feelin in the mood tonightPut me in the spotlight
Everything will be alright
Put me in the spotlight
I'm feelin in the mood tonightPut me in the spotlight
Everything will be alright
Put me in the spotlight
I'm feelin in the mood tonight
