

# Beehive

## Mark Olson

The tree of life  
The one you need  
The volunteer  
That grew now seems  
A beehive Won't you be the one to tell me?  
All our lives are calling  
And where to begin You light your lamp  
Your lamp goes out  
And kerosene  
Spills on the ground  
A beehive There I ran across a field  
A thousand reasons start beginning  
In your song Bring you lilac wine  
Bring you lilac wine  
Something I could do  
Something I could save for you Beehive  
Beehive What you see has been before  
What will come  
Your vandals dropped  
A beehive Can you see? Another side  
To live right my love you reached  
Across the sky Bring you lilac wine  
Bring you lilac wine  
Something I could do  
Something I could save for you Beehive  
Beehive
