Fast Forward

Don't Look Down

Fall asleep to me
I'll be there when you wake up
When you start your day your right next to me But I can't explane
How feelings move so fast
Once they start I can't control how my heart Feels for youBut i never knew
I'd see you smile
I fade into your eyes
We'll be hangin out
Forehead to forehead
My hand held in yoursFading fast without you here
I need you near to calm my fears
And be my brighest star
No one know what you are to me
Finding the right words to say never came so easily
Count on me to believe in youBut I never knew
I'd see you smile
I fade into your eyes
We'll be hangin out
Forehead to forehead
My hand held in yoursBut mine just is yours
They're surrounding me
When can we make all the history?
Mine just is yours
Surrounding me
When can we make all the history?But I would see you smile
I fade into your eyes
We'll be hangin out
Forehead to forehead
My hand held in yours
