

# Mine

## All About Eve

It doesn't hurt me when you pull my  
Strings, my purse, my heart, guitar and everything  
These demands are slowly turning me into something of a [unverified]My house is your house, my life is mine  
My car is your car but my mind is mine all mine  
This is where I draw the line, it's all mineWhat you want, well you just can't have  
What you want is your life's worth  
It drifts around in the universe and rockets backwards to the earth
