Shine

Laura Izibor

Wake up one morning you realize
Your life is one big compromise
Stuck in the job you swore
Was only temporaryFeel like the world is passing you by
Never done all the things you were here to try
Stuck in one place, got a pain in your face
From all your stressing outYou ask yourself theres got to be more
Than what Im living for
You ask yourself theres got to be something else
Something more, more, moreWell, let the sun shine on your face
And dont let your life go to waste
Now is the time, got to make up your mind
Let it shine on you, let it shine on youFeel like theres nothing, nowhere to go
You try and fight but you cant let go
Roll the pain, got so much to gain
Now is the timeYou ask yourself theres got to be something else
Something more, more, moreLet the sun shine on your face
And dont let your life go to waste
Now is the time, got to make up your mind
Let it shine on you, let it shine on youYou ask yourself theres got to be more
Than what Im living for
You ask yourself theres got to be something else
Something more, more, moreLet the sun shine on your face
And dont let your life go to waste
Now is the time, got to make up your mind
Let it shine on you, let it shine on youWell, let the sun shine on your face
And dont let your life go to waste
Now is the time, got to make up your mind
Let it shine on you, let it shine on youLet the sun shine on your face
And dont let your life go to waste
Now is the time, got to make up your mind
Let it shine on you, let it shine on you
