

Class War 2000

Good Riddance

Emancipating mistrust a western institution
now I guess it's up to us it's time for revolution
trickle-down poverty reduction of the middle class
systematic break down don't know why it happened so fastwe've got to fight back we've got to reclaim our lives
and destroy their sick power structurethey've kept us down too long with their greed and ignorance
they'll tell you that there's nothing wrong we ignore the obvious
Reaganomic backlash as we struggle to survive
we spend billions on destruction but we still can't feed ourselvesit's a new class war
