

Power Shift

Sonic Syndicate

i really doubt this is the right side of the force
youd better grab onto some hope
cause you are going to need it as we go
keep on fighting ignorance with even more ignorance
youll see that sometimes the hand of fate must be forced

and we are under the gun
a bullet with our name on
dont know where to run
just see a dead end

and we are under the gun
a bullet with our name on
dont know where to run
just see a dead end

lets sing the anthem of the last days
theres no turning back
lets sing together now for the last time(for the last time)

there wont be any revolution
if we dont use our gift
we have come to a conclusion
a powershift

how many times did god fall asleep on the job
i do find errors in his blueprints
humanity being thebiggest flaw
like inverted king Midas
we turn everything we touch to shit

and we are under the gun
a bullet with our name on
dont know where to run

just see a dead end

and we are under the gun
a bullet with our name on
dont know where to run
just see a dead end

lets sing the anthem of the last days
theres no turning back
lets sing together now for the last time(for the last time)

there wont be any revolution
if we dont use our gift
we have come to a conclusion
a powershift

i cannot see how my own world turned alien to me
release me from these shackles and ill be the first to cross...cross the line(cross the line)
will it be different on the other side

there wont be any revolution
if we dont use our gift
we have come to a conclusion
a powershift

there wont be any revolution
if we dont use our gift
we have come to a conclusion
a powershift.
