Live Young, Die Fast

Alkaline Trio

It's no big surprise we turned out this way
It's in our eyes like shallow graves

But we are one with the larva and weeds

We don't discriminate at all for what it's worthSo live young, die fast, no one will last

So sit back and relax, enjoy the crash

You're fade into black and you're gone

Live young, die fast, die fastYoung easy life and untimely death

This doesn't work at all for me so save your breath

You took your time and stashed it away

Deep down inside of a cardboard box marked rainy daySo live young, die fast, no one will last

So sit back and relax, enjoy the crash

It fades into black then it's gone

Live young, die fastAnd I feel a miracle in every breath that I breathe

Won't let this miracle end in tragedy

I sense a miracle in all that I see

Won't let this miracle slip away from meLive young, die fast, no one will last

So sit back and relax, enjoy the crash

It fades into black then it's gone

Live young, die fast, die fastLive young, die fast, no one will last, no

So sit back and relax, enjoy the crash

It fades into black then it's gone

Live young, die fast, die fast
