

I Will, If You Will

John Berry

Once upon a time
People fell in love
And they stayed in loveIt never crossed their mind
Not to see it through
When they said I doThis modern world changes so fast
Hearts break apart
Like they're made out of glassIt's getting hard to believe
In love that can last
I will if you willOnce in every life
Someone comes along
Like you've come alongAnd it would be so nice
If this happiness
Could go on and onBut in this modern world, troubles come by
People let go the first tear they cry
Someone has to be strong
To keep love alive, I will if you willBut in this modern world troubles come by
People let go the first tear they cry
Someone has to be strong for love to surviveI will if you will
Let's give it a try
Let's do it or die
I will if you will
