

# Fire With Fire (Rory Phillips Mix)

## Scissor Sisters

You can see that you're being surrounded  
From every direction  
And love was just something you found  
To add to your collection It used to seem we were number one  
But now it sounds so far away  
I had a dream we were running from  
Some blazing arrows yesterday You said, fight fire with fire  
Fire with fire  
Fire with fire  
Through desire, desire -sire, desire  
Through your desire Now the city blacks out the sun  
That you know is rising  
You can show me the work that you've done  
Your fears have been disguising  
Is it just me or is everyone  
Hiding out between the lines  
What will we be when we come undone  
Just a simple meeting of the minds? And we'll fight fire with fire  
Fire with fire  
Fire with fire  
Through desire, desire -sire, desire  
Through your desire  
We'll fight fire with fire  
Fire with fire  
Fire with fire  
Through desire, desire -sire, desire  
Through your desire Underneath your skies  
There's a million lights  
Burning brightly just like fireflies It's cold and heaven surrounds you from every direction  
Cause there's someone behind every hand  
That you've made a connection  
And now we're free to be number one  
The morning isn't far away  
I had a dream we were holding on  
And tomorrow has become today, become today And we'll fight fire with fire  
Fire with fire  
Fire with fire  
Through desire, desire -sire, desire  
Through your desire

We'll fight fire with fire  
Fire with fire  
Fire with fire  
Through desire, desire -sire, desire  
Through your desire
