

Rain

Dan Hill

Advisory - the following lyrics contain explicit language:

And the rain keeps falling
From the clouds in your eyes
As we try to hang on
To the time that's passed us by
And the deeper our love
The harder we cry You and I both slaves
To some far away dreams
That binds us as one
Then divide us it seems
That the deeper our love
The harder we try And life goes on I suppose
And love can fade as fast as it grows
Times, they can shake us
But nothing can break us you know And the trees are still standing
The water stays still
The air tastes so lonely
I fight off a chill
Let this song bid goodbye
Until we return Oh and life goes on I suppose
And love can fade as fast as it grows
Times, they can shake us
But nothing can break us you know And the rain keeps falling
From the clouds in your eyes
As we try to hang on
To the time that's passed us by
And the deeper our love
The harder we cry
