What We Have We Steal

Toadies

Shut down the disease Brush it aside and stand up off your knees Tip the scales Spin me some horrible, beautiful tales 'Cause now you're weak And you're tired and lonely You can't see what could Be yours for keeps all the while You can take what you want But you're not so nice any more Everything we have we steal Run your fingers over me Pull away the skin, uncover the disease With a weakness and a tenderness we kiss Consuming each other all over again You can take what you want But you're not so nice any more

Everything we have we steal

We steal

Yeah, we steal

You can take what you want

But you're not so nice any more

Everything we have we steal

Yeah, you can take what you want

But you're not so nice any more

You're not so nice any more

You're not so nice any more

Everything we have we steal

We steal

We steal

Yeah, we steal
