

Let's Stay Together Tonight

Air Supply

I feel your hand in mine, I touch your skin
Your heart is calling out, you want to let me in, to let me in
Your lips are silent now, we're not alone, I'd like to tell you
How much, I'd like to take you home, so I can make love to you I believe in you so and there's only one moment
to live
When you're here next to me, there's so much more I have to give When the wind blows, there's nowhere as you
can run to
Let's stay together tonight, I'm waiting for you
All the words that I told you will always be true
Let's stay together tonight, whatever we do Why must I keep pretending I'm in control?
When I can feel your senses burning through my soul
Through my soul I believe in you so and there's only one moment to live
When you're here next to me, there's so much more I have to give When the wind blows, there's nowhere as you
can run to
Let's stay together tonight, I'm waiting for you
All the words that I told you will always be true
Let's stay together tonight, whatever we do Hold me close, don't let me go, I just want you to say
That I need you, I want you to know, know When the wind blows, there's nowhere as you can run to
Let's stay together tonight, I'm waiting for you
All the words that I told you will always be true
Let's stay together tonight, whatever we do
