

Hey Lady (Acoustic)

The New Velvet

Ooo Yeah,
Hey lady, you got something I need,
I'm going crazy, you got something that keeps me on my feet
I don't know what it is but I know that it's true
That love makes no sense if I'm not loving you
Now I'm loving you Ooo yeah,
He runs around in the city downtown
Always catching the late train
It's always a good day
He likes to pretend the world is his playpen
Dropping his money on everything he sees He's got tattoos on his arm of the people that he loves
She's got a suitcase with studded stars from the places where she was Hey lady, you got something I need,
I'm going crazy, you got something that keeps me on my feet
I don't know what it is but I know that it's true
That love makes no sense if I'm not loving you
Now I'm loving you Said, now I'm loving you baby There was a time that I would have given up
But not anymore, no, never on this girl
She likes skittles from London
Sipping on sunsets, call her what you will He's got tattoos on his arm of the people that he loves
She's got a suitcase with studded stars from the places that she was Hey lady, you got something I need,
I'm going crazy, you got something that keeps me on my feet
I don't know what it is but I know that it's true
That love makes no sense if I'm not loving you
Now I'm loving you If you hear me on the radio, hello
And notice everything you do
Ooo yeah
Do do do do do do do
Hello
I'm calling out to you (calling out to you) When I sing
Hey lady, you got something I need,
I'm going crazy, you got something that keeps me on my feet
I don't know what it is but I know that it's true
That love makes no sense if I'm not loving you
Now I'm loving you When I sing
Hey lady, you got something I need,
I'm going crazy, you got something that keeps me on my feet
I don't know what it is but I know that it's true
That love makes no sense if I'm not loving you
Now I'm loving you I said, now I'm loving you baby

Said now I'm loving...She's got, she's got tattoos on her arm of the people that she loves
She's got a suitcase with studded stars
From the places that she was
From Paris to Peru
