

# Modem Implant

## A Telemetry

we rely so heavily  
on all those zero's and one's  
number crunching constantly  
until the day is done

can't get around it  
can't hide from this  
it's the fabric of the day

won't pass through it  
won't go around this  
it's technologies way

cellular hook ups  
to the main-brain  
you log on

modem implantation  
right to your brain  
modem implantation - insane

all those digital junkies  
needing their daily fix  
a search for answers in  
their cyber crypt

just bought into it  
just saw the lazier  
it's the practical voice

must be a part  
must hold the lead  
it's the only choice

network convergence  
to the central  
you log on

modem implantation  
right to your brain

modem implantation - insane

robotic zombies  
in an electric age  
not just a hobby  
it's how we live and breathe

modem implantation  
right to your brain  
modem implantation - insane
